

BERKIN AKKAYA

• front-end developer •

ABOUT

Creative and dedicated self-taught front-end developer, experienced in JavaScript frameworks like **Vue and React ecosystems** as well as Bootstrap, Tailwind, Vuetify, Next and Nuxt. Also has experience in **agile development** with Kanban and Scrum, used Jira.

EDUCATION

2019-2021 • **İstanbul Gedik University**
Information Security Technologies

2021-Now • **Anadolu University**
Management Information Systems

EXPERIENCE

2017 Independent Game Developer

I built **my own games** and **worked with teams** for game jams and independent projects. I left high school at 10th grade to become a **full-time game developer**. I worked at over 10 games, 3 of which published on **Google Play**.

2019 Distant Education at Istanbul Gedik University

While i was free because of the pandemic, i started learning about **front-end** development. Built many hobby projects using Vue and mostly used **Firestore as back-end**. Got to work with bootstrap, tailwind and React as well in the meantime. Besides hobby projects, i also took a few **freelance** jobs.

2020 Intern at Gedik Holding (one month)

August Created a link shortener web app, built a **service with NodeJS** and front-end with **Svelte**.

2021 Front-End Developer at Gedik Holding

April Worked on internal and external digitalization needs of Gedik Holding. Some of my key contributions includes;

- The **online application system** that allowed students to apply without visiting the school in less than a minute.
- **Price calculation module** (aday.gedik.edu.tr) helping candidates react up-to-date data easily.
- **Digital menu** for Healin Foods (menu.healinfoods.com) letting customers reach the menu via a QR code.
